

Cape Light Compact Presents Free Seminar on Energy Planning

Cape Light Compact, the local administrator for energy efficient programs on Cape Cod & Martha's Vineyard, is the go-to resource for business, industrial and municipal customers looking to implement energy-efficient strategies for both existing facilities and new construction in our region.

On **January 14, 2010**, Cape Light Compact will hold a **FREE SEMINAR** at the Massachusetts Maritime Academy to discuss emerging technologies that will affect new and existing buildings and offer detailed information about additional program funding available to implement energy efficient upgrades and boost savings.

Among the topics covered will be Cape Light Compact's energy efficiency initiatives, an update of Stimulus (ARRA) Activities, a brief look at the new Massachusetts Energy Code (a.k.a. Stretch Code), using available resources to get beyond code, and quick looks at the Advanced Building Program, LEED, and "Green Initiates" (MTC).

A key component to meeting our enhanced goals is working with industry professionals, architects, engineers and design-build professions to help specify and integrate energy efficient systems and equipment into existing retrofit plans, major renovations or new building design.

We look forward to meeting with you on January 14 and welcome your input on how we can work together to plan for today and tomorrow's growing energy needs in providing energy efficient products and services to our customers.

To register, please call our contact Vicki Marchant, Cape Light Compact's Commercial and Industrial Energy Efficiency Program Analyst at (800) 797-6699 or send us an email with the subject line **"Jan 14 Training Registration"** to info@capelightcompact.org. Please include with your name, company name, work address, phone, and email.

Energy Planning for Today & Tomorrow

Learn about emerging technologies that affect new & existing buildings

SEMINAR SCHEDULE

Massachusetts Maritime Academy

101 Academy Drive

Buzzards Bay, MA 02532

January 14, 2010

8:00 to 8:30 - register and coffee

8:45 to 9:00 - Welcome and seminar goals

9:00 to 9:15 - What's new in the world of (non-residential) energy efficiency and ARRA (economic stimulus) activity

9:15 to 9:45 - Stressing the need for documentation, an overview of energy efficiency programs

9:45 to 10:00 - Break

10:00 to 12:00 - Using the IECC 2009, an overview of each section (using existing programs and technology) and how to get beyond code + Q&A

12:00 to 1:00 - Lunch

1:00 to 1:15 - An overview of the Advanced Buildings Core Performance Program

1:15 to 1:30 - A brief look at energy code activity in MA: What will it look like tomorrow? What is this Stretch Code?

1:30 to 2:00 - A word about LEED and CHPS

2:00 to 2:30 - What's happening with the Green world and how you can be part of it

2:30 to 2:45 - Where to go for help

3:00 to 3:30 - Wind Generator Tour
