

efficient heating options *for Cape Cod*

assess your heating needs

energystar.gov from the U.S. EPA and DOE recommends that you replace your **heat pump or air conditioner** if it is more than **10 years old** and your **furnace or boiler** if it is more than **15 years old**

know your options

If you are considering a replacement...

Sign up for a **no-cost home energy assessment** and learn about a **0% HEAT Loan** at MassSave.com/heatloan

Check out the heating system options at the link below and links for **efficient options and rebates at MassSave.com**

install properly

energystar.gov estimates that almost half of all heating and cooling equipment never performs to advertised capacity because of improper installation

The sponsors of Mass Save® also offer incentives for quality installation for central cooling systems

consider incentives for new home construction

Look for incentives through the Mass Save new construction program for efficient buildings at MassSave.com

Check out the heating options and links for rebates at the link below
