Small Business Offerings

WE ARE MASS SAVE®:

WE ARE MASS SAVE®:

In a competitive small business environment, energy efficiency is a key element to maintaining a healthy bottom line. The Sponsors of Mass Save® are here to provide cost-effective, energy-saving solutions for small business owners.

→ But first: What is Mass Save?

Mass Save is a collaborative of six natural gas and electric utilities and energy efficiency service providers in Massachusetts:

WE ARE MASS SAVE®:

EVERSOURCE

nationalgrid

Together, the Sponsors of Mass Save share one common goal: to empower small business owners to save money and energy. **Generally, that begins with a no-cost energy assessment. To get started, visit [MassSave.com/SMBusiness](https://masssave.com/SMBusiness)**

Programs are funded through an energy efficiency charge on electric and/or natural gas bills, which is then reinvested into the communities through these energy efficiency programs. These programs help reduce reliance on the grid and the need to build new power generating facilities.

→ Benefits for small business owners:

Save money on overhead costs.

Improve the comfort and safety of their customers and employees.

Help Massachusetts meet its goal of being a clean energy state.

→ How do assessments work?

1

Complete the assessment.

2

Send a custom proposal of recommended energy-saving improvements and incentives.

The Sponsors will cover a portion of the recommended improvements to help offset costs.

3

Schedule a date for installation of upgrades through a trusted vendor.

Upgrades identified during the assessment may include:

- Lighting system upgrades
- HVAC system improvements
- Insulation/air sealing
- Refrigeration controls
- And more

Measures and incentives may vary among Sponsors.

30% of the energy used by a typical commercial building goes to waste.
