Mark D. Marini, Secretary  
Commonwealth of Massachusetts  
Department of Public Utilities  
One South Station, 3<sup>rd</sup> Floor  
Boston, MA 02110

Re: *Cape Light Compact JPE, D.P.U. 24-65*  
2023 Energy Efficiency Plan-Year Report

Dear Secretary Marini:

On behalf of the Cape Light Compact JPE (the “Compact”), enclosed is the Compact’s 2023 Energy Efficiency Plan-Year Report for filing with the Department of Public Utilities (the “Department”).<sup>1</sup> Plan Year 2023 was the second year of implementation under the *2022-2024 Massachusetts Joint Statewide Electric and Gas Three-Year Energy Efficiency Plan*, as reviewed and approved by the Department in D.P.U. 21-120 – D.P.U. 21-129. Please note that Appendix 3 (Technical Reference Manual-2023 Report Version), Appendix 4 (Evaluation Studies), Appendix 6 (GHG Emissions Reduction), Appendix 7 (Outside Funding), and Appendix 8 (Co-Delivery Strategy) are being provided on a coordinated, statewide basis under separate cover.

In addition, there are several Compact specific appendices filed with the 2023 Energy Efficiency Plan-Year Report. Appendix CLC-1 contains the Compact’s required reporting regarding its costs shared between its energy efficiency and operating budgets, including those related to consumer advocacy matters. *Three Year Plans Order*, D.P.U. 18-110 through D.P.U. 18-119 at 142-43 (2019); *Three Year Plans Order*, D.P.U. 21-120 through D.P.U. 21-129 at 293-96 (2022). Appendix CLC-2 contains a detailed description of the Compact’s C&I Existing Buildings enhanced incentives, as requested by the Department. D.P.U. 21-120 through D.P.U. 21-129 at n.167. Appendix CLC-3 contains the Compact’s Town Activity Reports and Appendix CLC-4 contains the Compact’s Energy Education Outreach Activities. The Compact is also filing the testimony of Margaret T. Downey regarding the 2023 implementation of the Cape & Vineyard

---

<sup>1</sup> This report is being submitted pursuant to the Energy Efficiency Guidelines § 4.2 and Hearing Officer’s Memorandum dated May 2, 2014 adopting the Energy Efficiency Plan-Year Report Template in D.P.U. 11-120-A, Phase II. Because June 1, 2024 falls on a Saturday, this report is being filed on the next succeeding business day, June 3, 2024. 220 CMR 1.02(2), (4); see G.L.c. 4, § 9.

Electrification Offering (“CVEO”), as requested by the Department, which includes two additional items for the Department’s consideration. *Cape Light Compact JPE*, D.P.U. 22-137 at 36, n.40.

In 2023, the Massachusetts Energy Efficiency Program Administrators<sup>2</sup> (the “Program Administrators”) successfully delivered ambitious energy savings for the year as they continued to pivot towards electrification. Statewide, the electric Program Administrators achieved 78 percent of the lifetime total MMBTu savings goal, and 79 percent of planned total benefits. The gas Program Administrators achieved 90 percent of the lifetime total MMBTu savings goal, and 99 percent of planned total benefits statewide. Additionally, for 2023, the electric Program Administrators achieved 79 percent of the GHG emissions reduction annual goal and the gas Program Administrators achieved 104 percent of the GHG emissions reduction annual goal.

These savings and benefits achievements, along with implementation enhancements described further below, demonstrate the Program Administrators’ continued commitment throughout 2023 to achieving equitable, cost-effective energy savings and GHG emissions reductions. With the enactment of significant state climate and energy legislation in 2021 and 2022, the energy efficiency plans are shifting focus towards the decarbonization of buildings. Weatherization continues to drive both energy savings and GHG reductions, though in the long-term, electrification of space heating will play a central role in reaching our decarbonization goals. In 2023, the Program Administrators promoted electrification through the use of high-efficiency heat pump technologies, significantly to replace inefficient delivered fuel and electric resistance heating systems. Although the shift towards decarbonization has come with challenges, the Program Administrators found success in 2023 by building on the foundation laid by past plans, and leveraging relationships with customers, contractors, and other vendors and stakeholders to coordinate efforts, share ideas and best practices, and serve customers. In 2023, the Program Administrators weatherized 59,877 homes and installed 21,604 residential heat pumps—exceeding 2023 residential heat pump goals by 5,205.

The Program Administrators also continued the rollout of significant program enhancements aimed at driving equitable outcomes and improving the customer experience. Working closely with the Equity Working Group of the Energy Efficiency Advisory Council, in 2023, the Program Administrators—together with ABCD—launched the Low-income Statewide Client Services Center and expanded low-income service capacity in Eversource and National Grid territories by authorizing certain Home Performance Contractors to serve low-income customers. These enhancements have led to improvements in customer experience and increased service to low-income customers. Additionally, the Program Administrators worked to implement the Strategic Renters Plan, support Community First Partners, issue grants for community education and workforce development, coordinate the Clean Energy Pathways internship program, host two

---

<sup>2</sup> The Massachusetts Program Administrators are: The Berkshire Gas Company, Eversource Gas Company of Massachusetts, d/b/a Eversource Energy, Fitchburg Gas and Electric Light Company, d/b/a Unitil (Gas Division), Liberty Utilities (New England Natural Gas Company) Corp., d/b/a Liberty, Boston Gas Company, d/b/a National Grid, NSTAR Gas Company, d/b/a Eversource Energy, Cape Light Compact JPE, Fitchburg Gas and Electric Light Company, d/b/a Unitil (Electric Division), Massachusetts Electric Company and Nantucket Electric Company, each d/b/a National Grid, NSTAR Electric Company d/b/a Eversource Energy.

Secretary Mark D. Marini

June 3, 2024

Page 3

minority- and woman-owned business enterprise summits, and continue assessment of language access needs and recommendations, among other efforts.

Residential efforts in 2023 were notable for successfully deploying heat pumps, exceeding the aggressive annual heat pump installation target for 2023, thanks to robust incentives and the success of market-building efforts like the Heat Pump Installer Network and engagement with heat pump manufacturers and distributors. In the commercial & industrial sector, the Program Administrators held a record number of “Main Streets” events in hard-to-reach communities to reach more small businesses and launched the electrification feasibility process in 2023. Significantly, the commercial & industrial prescriptive heat pump pathway saw rapid growth, increasing by over 200 percent statewide compared to the previous year.

The Program Administrators look forward to continuing to provide energy efficiency opportunities for customers throughout this Plan term and beyond. The Program Administrators thank the many contractors, business partners, governmental agencies and officials, and public stakeholders who have contributed to the many successes achieved in 2023 in delivering the Mass Save<sup>®</sup> programs.

Very truly yours,

A handwritten signature in blue ink, reading "Audrey Eidelman Kiernan".

## **SECTION I INTRODUCTION AND OVERVIEW**

### **Cape Light Compact JPE Overview**

The Cape Light Compact JPE (“Compact” or “CLC”) is pleased with the results for the second year (“2023 Plan-Year”) of its 2022–2024 Three-Year Energy Efficiency Plan (“2022–2024 Three-Year Plan”), the fifth of such plans envisioned by the Green Communities Act and approved by the Department of Public Utilities (“Department” or “DPU”). The Compact and the other Massachusetts Energy Efficiency Program Administrators (“Program Administrators” or “PAs”) diligently implemented their respective plans over the past year, making significant progress towards their three-year goals. The 2023 Plan-Year built on the nationally acclaimed accomplishments of the prior Three-Year Plans, showing remarkable success with respect to goal attainment and achievement of real benefits for the environment and the economy in the Commonwealth of Massachusetts. The Compact is on a trajectory to achieve its greenhouse gas (“GHG”) reduction goals.

The results of the second year of the 2022–2024 Three-Year Plan, presented in this 2023 annual report (“Plan-Year Report”), indicate that the Compact is on track to reach its three-year goals by the end of 2024. In 2023, the Compact achieved 112% of its lifetime energy savings goal, achieved 84% of its total benefit goal, and spent 102% of its planned budget.<sup>1</sup> Based on these results plus the planned values for 2024, over the three-year term, the Compact expects to achieve:

- cost-effective programs with a benefit-cost ratio (“BCR”) of 1.67;
- net benefits of \$139 million;
- avoided CO<sub>2</sub> emission reductions of over 28,000 metric tons in 2030;
- annual energy savings of 45 gigawatt hours (“GWh”);
- lifetime energy savings of 566 GWh;
- total benefits of \$347 million; and
- program costs of \$185 million.

---

<sup>1</sup> Lifetime energy savings do not include fuel switching or active demand response.

## Organization of Plan-Year Report

The Compact's 2023 Plan-Year Report<sup>2</sup> is organized as follows:

- Section I provides an overview of the 2023 Plan-Year.
- Section II provides Compact-specific data tables with data at the core initiative level.
- Appendix 1 provides explanations for (a) significant variances at the core initiative level and (b) any non-cost-effective core initiatives over the three-year term, consistent with the D.P.U. 11-120, Phase II, Energy Efficiency Plan-Year Report Template.
- Appendix 2 provides the Compact's BCR screening tool in Microsoft Excel format.
- Appendix 3 provides the statewide Technical Reference Manual.
- Appendix 4 provides detail on the year's evaluation efforts, including summaries for each statewide evaluation study and a complete copy of each evaluation study.
- Appendix 5 provides the statewide performance incentive model. Since the Compact is a public entity, it does not collect any performance incentives. As such, this section is not applicable to the Compact.
- Appendix 6 provides a statewide summary on the Program Administrators' GHG emissions reduction activities.
- Appendix 7 provides a statewide summary on outside funding efforts for the 2023 Plan-Year.
- Appendix 8 provides a statewide summary on the co-delivery of energy efficiency and renewable energy.
- Appendix CLC-1 provides a Compact-specific summary of shared costs and consumer advocacy matters.
- Appendix CLC-2 provides a Compact-specific summary of commercial and industrial ("C&I") Existing Building incentives.
- Appendix CLC-3 provides the Compact's town activity reports for the 2023 Plan-Year.
- Appendix CLC-4 provides the Compact's Energy Education Outreach activities for the 2023 Plan-Year.

---

<sup>2</sup> In previous annual reports, the Compact provided information on its financial reports. The Compact continues to provide its financial reports on its website at: [www.capelightcompact.org/reports](http://www.capelightcompact.org/reports).

**SECTION II**  
**CAPE LIGHT COMPACT JPE DATA TABLES**

## ***Energy Efficiency Data Tables***

### ***Overview***

*Cape Light Compact*

June 3, 2024

### **DATA OVERVIEW**

The following data tables provide a summary of the Program Administrator's benefits, costs, savings, and cost-effectiveness for 2022 through 2024. The planned values are consistent with each Program Administrator's 2022-2024 Three-Year Plan. The 2023 preliminary values are presented here for the first time as part of each Program Administrator's 2023 Plan Year Report.

### **SUPPORTING INFORMATION**

The data included in these tables is based on other supporting models. The primary supporting models used by the Program Administrators in the preparation of this 2023 Plan Year Report are the Benefit-Cost Screening model and the Performance Incentive model. These exhibits should be referenced when looking for more detailed analyses, such as measure-level savings. High-level summaries for each of these models are provided below.

#### **Benefit-Cost Screening Models**

The Benefit-Cost Screening model provides measure-level savings and benefits. This model uses the avoided cost values from the 2021 Avoided Energy Supply Cost study prepared by Synapse Energy Economics, Inc.

#### **GHG**

The avoided CO<sub>2</sub>e (metric tons) in the savings table (table IV.D.3.2.i) are calculated consistent with the methodology stipulated by the Massachusetts Executive Office of Energy and Environmental Affairs in Letter from Sec. Theoharides, "Greenhouse Gas Emissions Reduction Goal for Mass Save," July 15, 2021. See: <https://www.mass.gov/doc/greenhouse-gas-emissions-reduction-goal-for-mass-save/download>

#### **Performance Incentive Model**

The Performance Incentive model filed as part of the Joint Statewide Three-Year Plan provides support for the performance incentive dollars proposed for collection by the Program Administrator. Final performance incentive amounts will be based on the three-year term and will be subject to review and final approval in the three-year term report; the amounts shown in the Plan Year Report are based on the data available to date and will change as additional years of data are included. Performance incentives are not applicable to the Cape Light Compact.

### **EM&V ACTIVITIES**

The Evaluation, Monitoring & Verification (EMV) Section of the Joint Statewide Three-Year Plan describes in detail the EM&V activities planned for 2022-2024. The EMV section of each Program Administrator's 2023 Plan Year Report summarizes the evaluation results completed in 2022 and their impact on the 2023 evaluated results. The Technical Reference Library (TRL) has been updated to account for recent evaluation results.

**Notes**

- Significant variances, which require explanation, are defined as:
  - variances between planned and actual core initiative budget of 15 percent or greater;
  - variances between planned and preliminary core initiative total lifetime savings showing a decrease of 15 percent or greater;
  - variances between planned and preliminary core initiative total benefits showing a decrease of 15 percent or greater; and
- Variances between preliminary and evaluated core initiative total resource benefits are not calculated for the first program year because of prospective evaluation.
- Variances are calculated as a percent of the three-year goal, meaning variance are calculated as the percentage difference between the percentage of the Three-Year Plan goals planned to be achieved through the Plan Year Report year compared to the percentage of the Three-Year Plan goals actually achieved through the Plan Year Report year.
- Lifetime kWh savings are displayed without fuel switching or demand response values.
- Cells highlighted in the above tables indicate that a variance is significant enough to require explanation. Refer to the Program Administrator's Plan Year Report for explanations of significant variances.

#### Notes

- Plan year core initiative significant variance explanations are required for: (2) variances between planned and preliminary core initiative total lifetime savings showing a decrease of 15 percent or greater.
- Total lifetime savings are not calculated for active demand reduction ("ADR") measures. Correspondingly, a variance for total lifetime savings is not calculated for the ADR core initiatives in each sector.

**Notes**

- Where not otherwise indicated, budgets for each year are represented in nominal dollars (2022\$, 2023\$, 2024\$).
- Refer to common definitions for allocation of costs.
- The plan year variances provided above are intended to indicate the Program Administrator's performance in the plan year only. The variances used to determine significant variances are provided separately. The variances above and the significant variances use different calculations to determine variances on an annual basis and over the three-year term, respectively.

Notes  
Greenhouse gas values presented include GHG in 2025 and 2030, calculated consistently with the Secretary's letter establishing GHG goals for the Mass Save Programs. 2022-2024 Three Year Plans, D.P.U. 21-120 through D.P.U. 21-129, Exh. 1, App. D. Lifetime GHG values are presented consistent with the process outlined in response to information request DPU-Common 3-15 of 2022-2024 Three Year Plans, D.P.U. 21-120 through D.P.U. 21-129. Lifetime values were calculated using emissions factors provided in an independent third-party study; see Appendix 12.

Notes

- Costs and benefits for each year are presented in real dollars (2022\$).
- The Total TRC Costs are the sum of the Total Program Costs, Performance Incentives, and Participant Costs.
- The plan year variances provided above are intended to indicate the Program Administrator's performance in the plan year only. The variances used to determine significant variances are provided separately. The variances above and the significant variances use different calculations to determine variances on an annual basis and over the three-year term, respectively.

Notes  
This table is provided in compliance with the Department's Order at 111: "the Program Administrators shall revise the Energy Efficiency Data Tables in a manner that provides the allocated costs, benefits, and savings associated with their electrification offerings by sector. The revised tables shall be submitted as a compliance filing in these proceedings, as well as in future Annual Reports and Term Report proceedings." The PAs note that it is not practically feasible to allocate overhead costs to specific measures; therefore, this table only represents direct incentive costs paid for electrification measures.

### Notes

- The above calculations are used to prepare the previous data tables.
- This table is provided consistent with the Department's directives in D.P.U. 18-110 through D.P.U. 18-119, at 75 to provide a detailed list of calculated fields used in creating the pivot tables.

**APPENDIX 1**  
**SIGNIFICANT CORE INITIATIVE VARIANCES**  
**& COST-EFFECTIVENESS**

Program Administrator-specific narrative explanations for the Compact are as follows.

On September 14, 2023, the Compact submitted to the Department for review its request for a Mid-Term Modification (“MTM”) to its Three-Year Plan. The Compact has experienced greater-than-anticipated demand for services that it projects will lead to expenditures exceeding the Department-approved term budgets for three programs: the Residential Hard-to Measure Program, the Income Eligible Hard-to-Measure Program, and the Income Eligible Existing Buildings Program. In addition, the Compact has experienced lower-than-anticipated demand for services in the C&I sector that it projects will result in the Compact expending less than the Department-approved term budget. On March 14, 2024, the Department stamp approved the Compact’s MTM.

## **I. Residential Programs**

### **A. Residential New Buildings**

For the Residential New Buildings program, the 2023 actual BCR is 4.19, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 1.55.

#### **1. Residential New Homes & Renovations**

##### *a. Significant Variances*

For this core initiative, actual total benefits were significantly less than planned by 39%.

The 2023 variance in total benefits is driven by the continued change in fuel mix for HVAC measures. HVAC measures yielded significantly greater lifetime electric savings in 2022 relative to plan, but achieved less than the planned total benefits for the year. All-electric homes made up a higher portion of participants than planned in 2022. In 2023, this change in fuel mix continued. HVAC measures drive overall savings and benefits for this program, comprising the majority of planned savings and benefits. Therefore, changes in HVAC measures yield significant variances for the core initiative overall and in this case for the variance in total benefits.

In response to this variance, the Compact does not anticipate any changes to program design or implementation. The trends the Compact is seeing align with its goal to increase all-electric homes for the 2022-2024 plan term. The Compact's new all-electric home offering, launched in 2022, has been so successful that the Compact has already reached its all-electric path goals for the 2022-2024 Three-Year Plan.<sup>3</sup> The Compact also saw a higher volume of water heating measures installed than planned.

The Compact does not currently expect this variance will affect its ability to achieve its savings or benefits goals by the end of the three-year term.

##### *b. Cost-Effectiveness*

For the Residential New Homes & Renovations core initiative, the 2023 actual BCR is 4.19, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 1.55.

---

<sup>3</sup> See, D.P.U. 21-126, Exh. 1, 2022-2024 Three-Year Energy Efficiency Plan, pages 88-89.

## **B. Residential Existing Buildings**

For the Residential Existing Buildings program, the 2023 actual BCR is 1.91, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 2.08.

### **1. Residential Coordinated Delivery**

#### *a. Significant Variances*

For this core initiative, actual expenditures, savings, and benefits were lower than planned. Program costs were 41% lower than planned, savings were 48% lower than planned, and total benefits were 45% lower than planned.

The decrease in expenditures, savings, and benefits in 2023 were primarily driven by decreased adoption of envelope measures as compared to plan. In addition, the average per-unit incentives, savings, and benefits for the envelope measures were less than planned, yielding a greater decrease in the variance metrics. The decrease in envelope measure adoption in 2022 and 2023 is likely tied to strong demand for envelope measures in the second half of the 2019-2021 plan term, when the Program Administrators offered a 100% incentive for weatherization measures to help recover from the downturn in participation caused by the COVID-19 pandemic.

In addition, the Compact installed fewer heat pumps than planned in 2023 within the multi-family segment. The Compact has continued to look for market rate multifamily sites where vendor guided heat pump conversion projects can be implemented cost-effectively. While no new sites were completed in 2023, at least 2 additional sites have been identified as likely cost-effective applications, and the specifics of those site-wide offers are currently in development and expected to be ready for roll out in Q2 of 2024.

In response to these variances, the Compact will continue to conduct marketing and outreach efforts with a focus on moderate income and renters to drive program participation. The Compact will continue working to identify opportunities and engage customers, and is optimistic that demand for envelope measures will pick up in 2024. The Compact does not anticipate any other changes to program design or implementation.

The Compact does not currently expect these variances will affect its ability to achieve its savings or benefits goals by the end of the three-year term.

*b. Cost-Effectiveness*

For the Residential Coordinated Delivery core initiative, the 2023 actual BCR is 2.02, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 2.34.

**2. Residential Conservation Services**

*a. Significant Variances*

For this core initiative, actual expenditures were significantly less than planned by 38%.

In Residential Conservation Services, the Compact spent less on assessments than originally planned. Part of this reduction was due to fewer assessments than originally planned. After the generous incentives during 2021 for the COVID-19 pandemic, the number of customers that wished to sign up for assessments dropped. Additionally, there were labor shortages that led to longer waits for the assessments themselves. While the labor shortages have been largely resolved, the demand for home energy assessments has not been as high as planned. These factors combined to reduce the overall number of completed assessments.

In response to this variance, the Compact will continue working to identify opportunities and engage customers. The Compact does not anticipate any changes to program design or implementation.

*b. Cost-Effectiveness*

BCRs are not calculated for the Residential Conservation Services core initiative because benefits are not calculated for this core initiative.

**3. Residential Retail**

*a. Significant Variances*

The residential retail initiative, which is driven by rebate application submissions, has seen higher than expected interest, which has translated into program costs 20% higher than planned. These have been driven primarily by HVAC measures such as heat pumps which have higher costs than other measures within this initiative.

*b. Cost-Effectiveness*

For the Residential Retail core initiative, the 2023 actual BCR is 1.94, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 2.05.

**4. Residential Active Demand Reduction**

*a. Significant Variances*

For this core initiative, there are no significant variances.

*b. Cost-Effectiveness*

For the Residential ADR core initiative, the 2023 actual BCR is 2.25, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 2.09.

## **II. Income-Eligible Programs**

In 2023, the Compact spent 23% of its total budget on the Income-Eligible sector. The Compact's Income-Eligible budget for the full three-year term is expected to be 17% of the three-year total budget, including actual expenditures for 2022 and 2023 and the planned budgets for 2024. Accordingly, the Compact expects to exceed the statutory requirement to spend at least 10% of its budget on the Income-Eligible sector.

The Compact's Income-Eligible spending in 2022 and 2023 marks a notable improvement over the 2019-2021 term, during which the Compact spent 7.7% of its budget on the Income-Eligible sector. This improvement stems largely from successful efforts to mature the Income-Eligible heat pump installation program and its underlying regional infrastructure. In addition, the Compact has been able to achieve improved weatherization results due to the combination of increased R-value guidelines and by addressing more weatherization barriers such as vermiculite and mold, both of which are new to the 2022-2024 plan term. The Compact expects its strong performance in Income-Eligible spending will continue throughout this plan term. As noted earlier, the Compact received stamp approval of its MTM, which requested a total program cost of 193% over the term.

Consistent with the Department's directives,<sup>4</sup> the Compact conducted a third-party study on its remaining potential for serving low-income customers, the results of which were filed with the Department and the EEAC on April 1, 2024 to inform the Compact's 2025-2027 Three-Year Plan.<sup>5</sup>

### **A. Income-Eligible Existing Buildings**

For the Income-Eligible Existing Buildings program, the 2023 actual BCR is 1.02 while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 1.26.

#### **1. Income-Eligible Coordinated Delivery**

##### *a. Significant Variances*

For this core initiative, actual expenditures were 95% higher than planned. The primary driver of increased program expenditures in 2022 and 2023 was the increase in heat pump installations, combined with the cost of those installations which were more expensive than planned. Because heat pumps made up more than half of planned spending, the increase in per-unit costs had a

---

<sup>4</sup> D.P.U. 22-137 (2023), pages 42-43.

<sup>5</sup> See D.P.U. 22-137.

significant impact on the total budget. The Department approved the Compact's requested MTM for the Income-Eligible Coordinated Delivery program on March 14, 2024.

As a result of these variances, the Compact does not expect to change the core initiative's design or implementation, as the current design is proving successful at achieving benefits and GHG reductions. The Compact does not currently expect these variances will affect its ability to achieve its savings or benefits goals by the end of the three-year term.

*b. Cost-Effectiveness*

For the Income-Eligible Coordinated Delivery core initiative, the 2023 actual BCR is 1.02, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 1.26.

**2. Income-Eligible Active Demand Reduction**

*a. Significant Variances*

For this core initiative, actual expenditures were 100% lower than planned. As noted previously, the Compact did not assign any costs to this initiative in order to be consistent with the other PAs statewide. Any costs for residential and income-eligible ADR will be assigned to the Residential ADR initiative. In responding to information request DPU 1-3 in D.P.U. 23-60, the Compact realized that it had inadvertently assigned \$75 to this core initiative in 2022. The Compact has since corrected this cost to be consistent with the other Program Administrators.

In response to these variances, the Compact does not anticipate any changes to program design or implementation. The Compact only budgeted approximately \$1,300 per year for this core initiative, so the decision not to assign any costs to this initiative has a large effect relative to the 2022-2024 Three-Year Plan.

The Compact does not currently expect these variances will affect its ability to achieve its savings or benefits goals by the end of the three-year term.

*b. Cost-Effectiveness*

For the Income-Eligible ADR core initiative, the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 42.60. Due to there being no costs for this initiative in 2023, there is no BCR for 2023.

### III. Commercial Programs

#### A. C&I New Buildings

For the C&I New Buildings program, the 2023 actual BCR is 2.00, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 4.27.

#### **1. C&I New Buildings & Major Renovations**

##### *a. Significant Variances*

For this core initiative, actual expenditures were 50% lower than planned and total resource benefits were 70% less than planned.

The primary driver for the decrease in spending compared to the 2022-2024 Three-Year Plan is measure mix. The Compact installed more lighting measures as compared to other, more expensive measures such as HVAC measures. Despite spending less than anticipated, the Compact was able to achieve its planned lifetime electric savings and total benefits.

The nature of new construction is highly variable, and program measure mix relies upon construction choices. These choices are often outside of the Compact's control. The COVID-19 pandemic had a depressing effect on the construction market and may continue to have lingering effects. As described in the 2022–2024 Three-Year Plan, the delivery model for this program has been significantly modified.<sup>6</sup> The Compact also recently received stamp approval for its MTM where an under-expenditure was expected at the sector level.

A significant variance also exists between preliminary and evaluated total resource benefits, with evaluated benefits being 70 percent below planned benefits. This decrease represents a reduction in gross energy savings resulting from an evaluation of the PA code promulgation efforts. The study, Codes and Standards Promulgation Gross Savings Adjustment Study (2022 Plan-Year Report D.P.U. 23-60 Appendix 4D, Study 22-18), updated the expected gross technical potential savings for 2023 for the adopted code amendments proposed by the PAs. The study found that the estimated savings for 2023 have decreased since the MA19X07-B-CDPROMATT study was completed in 2020. Due to the relative production in this core initiative during this plan year, planned savings from the code promulgation efforts were a relatively high share of overall savings

---

<sup>6</sup> See, D.P.U. 21-126, Exh. 1, 2022-2024 Three-Year Energy Efficiency Plan, pages 158-161.

in this core initiative for the Compact and a reduction to the evaluated savings resulted in a considerable decrease in the overall total resource benefits achieved by the initiative.

Given the variable nature of this core initiative, the Compact does not currently expect to make any significant changes to the core initiative's design or implementation. The Compact expects to utilize the budget (as modified by its approved MTM) and meet the goals for lifetime savings and total benefits in the three-year timeframe.

*b. Cost-Effectiveness*

For the C&I New Buildings & Major Renovations core initiative, the 2023 actual BCR is 2.00, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 4.27.

**B. C&I Existing Buildings**

For the C&I Existing Buildings program, the 2023 actual BCR is 1.93, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 1.73.

In D.P.U. 23-58, the Department approved the Compact's MTM for a 24% decrease in the Compact's three-year term budget for the C&I sector, which was due in large part to the variances described below in the C&I Existing Buildings program.

**1. C&I Existing Building Retrofit**

*a. Significant Variances*

For this core initiative, actual expenditures and total benefits were significantly lower than planned. Total program costs were 40% lower than planned and total benefits were 34% lower than planned.

The variances in the C&I Existing Building Retrofit core initiative were due mainly to less-than-expected participation and the varied measure mix that was installed. The Compact is still experiencing labor shortages and supply chain issues as a result of the COVID-19 pandemic, which reduced opportunities for customers to invest in energy efficiency during 2022 and 2023.

While generous incentives were introduced in 2022 for the installation of heat pumps, the lack of large heat pump equipment available for large commercial customers impacted the Compact's ability to install the planned number of systems. The Compact is continuously working to identify viable custom electrification opportunities. Also, many of the Compact's commercial customers

have natural gas for heating, which results in many custom electrification opportunities being served and attributed to the gas Program Administrator.

The reduction in total spending and total benefits mirrored the lower participation numbers for residential end use, electrification, and whole initiative sub-offerings. In 2023, the Compact continued customer engagement, marketing, and education on the various measures and offers that are available.

The turnkey offering saw great improvement in 2022 and 2023 relative to the 2019-2021 plan term, with increases in the installation of non-lighting measures and participation, which led the Compact to almost exceed its planned goals for this offering. The Compact is looking forward to 2024 with a suite of planned Main Streets efforts and more comprehensive measures being implemented.

The Compact's MTM, approved in D.P.U. 23-58, noted the impact of material and labor shortages, as well as rising prices for materials and equipment resulting from the COVID-19 pandemic. This resulted in a significant underspend during 2022 and the first part of 2023.

As a result of these variances, the Compact will continue working to identify opportunities and engage customers, but does not intend to change program design or implementation. The Compact does not currently expect these variances will affect its ability to achieve its savings or benefits goals by the end of the three-year term beyond the approved MTM.

*b. Cost-Effectiveness*

For the C&I Existing Building Retrofit core initiative, the 2023 actual BCR is 1.56, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 1.50.

**2. C&I New & Replacement Equipment**

*a. Significant Variances*

For this core initiative, total program costs were lower than planned by 40%.

The Compact underspent the budget in the New & Replacement Equipment core initiative because of changes in expected measure mix. Measures implemented through the midstream pathway dominated participation in this core initiative. Specifically, midstream lighting, HVAC, and food service measures were oversubscribed as compared to the 2022-2024 Three-Year Plan, while measures installed through applications were undersubscribed, specifically electrification measures, e.g., heat pumps and commercial lawn equipment.

Many commercial customers already heat with natural gas and thus would be served by the gas Program Administrator for electrification. Or, if the customer heats with oil, propane or electric resistance, they may opt to switch to natural gas instead of an electric heat pump due to the lower operating costs, despite the energy efficiency incentives offered to offset upfront capital costs. The Compact plans to continue educating consumers about the benefits of electrification and market these offers to the appropriate audiences. However, high electricity costs compared to natural gas costs may continue to reduce the uptake of space and water heating electrification.

For lawn equipment, many of the battery-powered, commercial-grade systems are still prohibitively expensive compared to their gas-powered counterparts. As this is a relatively nascent market, the Compact expects costs to decrease.

As a result of these variances, the Compact will continue working to identify opportunities and engage customers, but does not intend to change program design or implementation. The Compact does not currently expect these variances will affect its ability to achieve its savings or benefits goals by the end of the three-year term.

*b. Cost-Effectiveness*

For the C&I New & Replacement Equipment core initiative, the 2023 actual BCR is 3.03, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 2.33.

**3. C&I Active Demand Reduction**

*a. Significant Variances*

For this core initiative, actual expenditures and total benefits were lower than planned. Total program costs were 24% lower than planned and total benefits were 61% lower than planned. As noted in the Compact's data tables, total lifetime savings are not calculated for ADR measures. Therefore, a variance for total lifetime savings is not calculated for this core initiative.

The Compact's Curtailment Service Providers ("CSPs") continue to have issues recruiting new customers in the Compact's service territory. This is largely due to the lack of large C&I customers with sophisticated enough systems that would allow them to effectively curtail load without impacting necessary processes or customer and/or employee comfort.

Additionally, development of large battery projects continues to be slow. The statewide 150% site load cap on ConnectedSolutions incentives that went into place in 2023 has also impacted the economics of many projects.

Because most of the demand response budget is customer incentives that are directly tied to customer performance, low participation (due to the reasons outlined above) also accounts for lower-than-planned expenditures.

In response to these variances, the Compact launched the Building Management System (“BMS”) ADR adder in 2024 which incentivizes customers to add demand response configurations to their new or retro-commissioned BMS system and enroll it in ConnectedSolutions. The Compact continues to work with trade allies to encourage participation when addressing standard efficiency upgrades. In addition, there is a proposal in the 2025-2027 Three-Year Plan to increase the targeted dispatch incentive in hopes of increasing enrollment.

*b. Cost-Effectiveness*

For the C&I ADR core initiative, the 2023 actual BCR is 2.04, while the BCR for the three-year term after accounting for actual results from 2022 and 2023 and planned values for 2024 is 3.10.

## **APPENDIX 1A COST-EFFECTIVENESS OF RESIDENTIAL SECTORS AND PROGRAMS**

The cost-effectiveness of the residential sector, programs, and core initiatives are realizing a benefit cost ratio (“BCR”) of at or under 1.0 for some Program Administrators. This is predominantly due to electrification projects and measures that have very low BCRs.

The Department is required to review the three-year plans for cost effectiveness. G.L. c. 25, § 21(b)(3). This review ensures that the three-year plans capture energy savings and other benefits with values greater than the cost of deployment. G.L. c. 25, § 21(b)(3). Under the Green Communities Act<sup>7</sup>, as amended by the Energy Act of 2018<sup>8</sup> and the Climate Act of 2021<sup>9</sup>, for the purposes of cost-effectiveness screening, programs are aggregated by sector. G.L. c. 25, § 21(b)(3). The Department also monitors cost-effectiveness at the program and core initiative level for prudent spending of ratepayer funds. 2019-2021 Three-Year Plans Order, D.P.U.18-110 through D.P.U. 18-119, at 74 (2019).

In determining cost-effectiveness, the Department relies on the Total Resource Cost (“TRC”) test. Energy Efficiency Guidelines, § 3.4.3. The TRC test “includes all benefits and costs associated with the energy system, as well as all benefits and costs associated with Program Participants.” *Id.* Additionally, the Climate Act of 2021 requires the Program Administrators to include the benefits associated with the societal value of GHG emissions reductions, except for those resulting from fossil fuel heating or cooling equipment.

The Climate Act of 2021 also established GHG emissions reduction goals for the 2022-2024 Three-Year Plans, which are set by the Secretary of the Executive Office of Energy and Environmental Affairs (“EEA”). Electrification is consistent with the goals of the Climate Act, and the 2022-2024 Three-Year Plans are designed to meet or exceed the EEA Secretary’s goal for reducing GHG emissions through the installation of energy efficiency measures, particularly focusing on weatherization and electrification. 2022-2024 Three-Year Plans, D.P.U. 21-120 through D.P.U. 21-129, Exh. 1, at 12 (“Exh. 1”). The PAs are making a concerted effort to promote electrification, particularly in instances in which customer economics and building characteristics are favorable. Exh. 1, at 12. Specifically, customers who currently heat with oil, propane, or electric resistance are more likely to realize reduced heating costs from electrification. Exh. 1, at 13. This is particularly true when electrification is coupled with weatherization, and the Program Administrators are implementing incentives as directed by the Department to encourage

---

<sup>7</sup> An Act Relative to Green Communities, Acts of 2008, chapter 69.

<sup>8</sup> An Act to Advance Clean Energy, Acts of 2018, chapter 227.

<sup>9</sup> An Act Creating a Next Generation Roadmap for Massachusetts Climate Policy, Acts of 2021, chapter 8.

weatherization with electrification. 2022-2024 Three-Year Plans Order, D.P.U. 21-120 through D.P.U. 21-129, at 108-110 (2022).

Customer economics for electrification of customers using natural gas for heating, however, can be tenuous. Exh. 1, at 13. This is primarily due to the relatively low cost of natural gas compared to electricity prices, resulting in a material chance that an electrification of a natural gas heating source will lead to an increased energy burden for the customer.

Additionally, applying the TRC test to these measures results in a BCR that is well below 1.0, meaning that, in addition to potentially increasing the customer's energy burden, they are not cost-effective in the context of the energy efficiency programs. Nonetheless, as recognized in the 2050 Decarbonization Roadmap, "combustion of natural gas, oil, and propane for building heating is the largest end use contributor to emissions in the buildings sector." Massachusetts 2050 Decarbonization Roadmap (December 2020), at 45. Natural gas customers are also turning to the Mass Save programs for assistance in displacing some or all of their natural gas use with electric heat pump technology, in an effort to decarbonize their homes, in spite of the negative economic impact. Thus, to support the Commonwealth's climate goals and reach the GHG emissions reduction goals for the 2022-2024 Three-Year Plans, the Program Administrators offer incentives for natural gas electrification measures. Exh. 1, at 13.

The Program Administrators have had a stronger than planned demand for incentives for natural gas electrification projects in the current term and the PAs only expect this demand to increase over the remainder of the 2022-2024 term. However, the low BCR of these measures is resulting in lower than planned cost-effectiveness in the residential sector, programs, and core initiatives which for some Program Administrators has resulted in the BCR dropping to or below 1.0.

The Program Administrators seek regulatory guidance from the Department to permit the continued offering of electrification equipment through these Three-Year Plans to achieve the robust and legally mandated GHG emissions reduction goals, regardless of the fact that such offerings may lead to non-cost-effective programs or sectors. Alternatively, the Program Administrators seek clarity from the Department with respect to the relationship between cost-effectiveness and electrification, to better establish strategies for achieving GHG emissions goals for the Program Administrators, their vendors, and their customers. The Program Administrators have GHG emissions reductions goals that are statutorily mandated, but also a requirement to keep cost-effective programs. The Program Administrators want to continue to offer incentives to customers seeking to displace their natural gas through electrification and will strive to do so in a cost-effective manner in order to reach the 2022-2024 Three-Year Plans GHG emissions reduction goals. However, the residential sector and programs are in jeopardy of not being cost effective for at least some PAs.

**APPENDIX CLC-1  
CAPE LIGHT COMPACT JPE  
SHARED COSTS AND CONSUMER ADVOCACY MATTERS**

The Compact routinely incurs costs that it shares between its energy efficiency activities and its non-energy efficiency activities (e.g., its municipal aggregation power supply program). These costs are allocated between the Compact's energy efficiency and its operating budget. In D.P.U. 18-116, the Department placed new reporting requirements on the Compact for costs: (1) shared between its energy efficiency and operating budget, and (2) related to consumer advocacy matters. D.P.U. 18-116 at 142-143.

**I. Shared Costs**

**A. Background on Shared Costs Allocation Method**

In its 2022-2024 Three-Year Plan filing, the Compact proposed to use percentage allocation factors that are the same for all three years of the plan term, are locked in for planning and reporting for the entire three-year term and are the same for all shared costs. The allocation factors are based on actual time that Compact staff spent on energy efficiency or municipal aggregation in 2021 and expected changes in staff over the term. The only shared cost for 2022-2024 that did not, as a default, have a fixed allocation factor tied to the breakdown of staff salaries in 2021 was legal costs (for legal consumer advocacy and other legal shared costs). Those shared legal cost allocations are based on: (1) Governing Board approvals of consumer advocacy worksheets for consumer advocacy matters; (2) allocations to aggregation/operating or energy efficiency based on the subject matter of the legal service provided; or (3) the same fixed percentage breakdown tied to staff salaries as described above because the legal matter is employee related (e.g., certain pension and other post-employment liabilities, or "OPEB" matters, etc.).

The Department found that it is reasonable for the Compact to allocate its shared costs based on employee time spent on energy efficiency versus municipal aggregation over the 2022-2024 Three-Year Plan term. However, rather than establish allocation factors based on Compact employee time measured over a single year, the Department found it is appropriate to measure the Compact's employee time over a period of six years (i.e., 2016 through 2021) for cost allocation purposes. D.P.U. 21-120 through D.P.U. 21-129 Three-Year Plans Order at 290-294 (2022). In addition, the Department determined that the Compact's proposal to establish an allocation factor for shared legal/consumer advocacy costs each year is reasonable. *Id.* at 296. The Department also required that the Compact present the Department with a detailed study of cost drivers for each category of shared costs as part of the Compact's 2025-2027 Three-Year Energy Efficiency Plan. *Id.* at 297. This study is underway.

As noted in the Compact's April 1, 2022 Compliance Filing in D.P.U. 21-126 ("Compliance Filing"), Proposed Shared Cost Allocation Factor at 1, the Compact does not have employee time spent on energy efficiency versus municipal aggregation prior to April 2019. In measuring the employee time over the course of April 2019 through December 2021, the sum of hours over that period showed that Compact employees spent 94 percent of their time on energy efficiency matters and 6 percent of their time on non-energy efficiency matters. Thus, for planning and reporting in each year of the 2022-2024 Three-Year Plan, the Compact informed the Department that it will allocate 94 percent of shared costs to energy efficiency. The Department continues to investigate these shared cost allocation factors. *Cape Light Compact JPE*, D.P.U. 22-135 at 8-9 (2022).

The Department has expressed concern that a three-year timeframe may not be an appropriately representative period upon which to set allocation factors, citing specifically to the fact that the Compact's last municipal aggregation power supply procurement occurred in 2018, and thus would not be captured in the 2019-2021 timeframe. D.P.U. 22-135 at n.13. While the Department is correct that there has not been another procurement for the Compact's aggregated electric load since 2018, there are numerous municipal aggregation and power supply related activities that the Compact undertook in 2019-2021. These activities are accounted for in the employee timesheets included with the Compact's Compliance Filing, Proposed Shared Cost Allocation Factor, Attachment 2, and include the following:

- Engaging in day-to-day power supply program management and contract administration activities and exploring options for the long-term inclusion of renewable energy and renewable energy certificates in the Compact's power supply offering.
- Negotiating and executing an amendment to its competitive electric supply agreement.
- Undertaking a retail power supply procurement process for approximately 1500 municipal and other governmental entity electric accounts on the Cape and Vineyard (a service the Compact provides in accordance with its Joint Powers Agreement).
- Contracting with Habitat for Humanity to support the installation of renewable energy systems on low-income housing.
- Participating as a consumer advocate or otherwise in multiple Department dockets on non-energy efficiency matters (e.g., D.P.U. 19-07, D.P.U. 20-46, D.P.U. 20-145, D.P.U. 21-80).

These activities are undertaken by the Compact's Power Supply Planner, with oversight from the Compact Administrator. While there are no timesheets to document individual employee time spent on Compact matters from 2016-2018, the Compact submits there were not significantly more hours dedicated to power supply related activities in 2016-2021 as compared to 2019-2021. For the reasons discussed herein, including those three additional years would not materially alter the cost allocation factors submitted with the Compliance Filing.

## B. 2023 Shared Costs

For shared costs, in its Plan-Year reports, the Department requires the Compact to provide a comparison of planned allocations versus actual spent dollars and an explanation of any variance greater than 10% (D.P.U. 18-116 at 142).

The following tables provide, for each shared cost in 2023, (1) the allocation factor methodology, (2) the allocation factors used for planning and reporting, and (3) the planned and actual allocated costs in dollars.

Table 6.A.1. 2022–2024 allocation factor methodology

Shared Cost	Allocation Factor Methodology
Legal, Consumer Advocacy	Case-specific, based on Board Consumer Advocacy Allocation Worksheet
Legal, Other	Case-specific
Salary	2019-2021 time spent on energy efficiency or operating activities
Software licenses	Same as salary (weighted average across staff based on time)
Payroll services	Same as salary (weighted average across staff based on time)
Internet	Same as salary (weighted average across staff based on time)
Rent	Same as salary (weighted average across staff based on time)
Custodial	Same as salary (weighted average across staff based on time)
Other Utilities	Same as salary (weighted average across staff based on time)
Auditor	Same as salary (weighted average across staff based on time)
Treasury services	Same as salary (weighted average across staff based on time)
Financial software	Same as salary (weighted average across staff based on time)
Insurance	Same as salary (weighted average across staff based on time)

Table 6.A.2. 2023 shared planned and actual costs and allocation factors

Rent	101,520	6,480	108,000	109,267	6,975	116,242	7,747	495	8,242	8%	8%	8%
Custodial	21,388	1,365	22,753	21,601	1,379	22,980	214	14	227	1%	1%	1%
Other Utilities	64,799	4,136	68,936	105,164	6,713	111,877	40,365	2,576	42,941	62%	62%	62%
Auditor	56,086	3,580	59,666	57,221	3,652	60,874	1,135	72	1,208	2%	2%	2%
Treasury services	19,587	1,250	20,837	65,886	4,205	70,092	46,299	2,955	49,255	236%	236%	236%
Financial software	48,461	3,093	51,554	44,792	2,859	47,651	(3,669)	(234)	(3,903)	-8%	-8%	-8%
Insurance	56,144	3,584	59,728	56,768	3,624	60,392	624	40	664	1%	1%	1%
<b>TOTAL</b>	<b>3,549,472</b>	<b>353,839</b>	<b>3,903,310</b>	<b>3,382,978</b>	<b>261,634</b>	<b>3,644,612</b>	<b>(166,493)</b>	<b>(92,205)</b>	<b>(258,698)</b>	<b>-5%</b>	<b>-26%</b>	<b>-7%</b>

As indicated in the above table, actual shared costs were about \$260,000 or 7% less than planned costs. Below, the Compact provides an explanation for each shared cost with a significant variance. In general, the reason for most variances is that actual costs reflect total incurred costs, and these sometimes vary from the estimated values. The Compact uses the best available information at the time of planning to estimate costs. This includes historical information as well as the Compact's best estimate of projected costs.

- *Legal, Consumer Advocacy and Other.* See the following section for a discussion on consumer advocacy costs.
- *Software Licenses.* Software license costs increased relative to plan for the following reasons:
  - All Microsoft Office E3 licenses were replaced with Microsoft Business Premium to transition away from the NAS Domain Server in 2024.
  - The number of Microsoft Power BI Pro licenses increased from 1 to 18 to provide all staff with reporting access.
  - The number of Microsoft Exchange licenses increased from 26 to 33 to cover all Compact Board members.
  - 6 new Zoom Power Pack licenses were added to provide Call Center activity visibility.
- *Payroll Services.* Payroll services decreased relative to plan. The Compact likely over-estimated the cost of payroll services in the 2022-2024 Three-Year Plan. Costs for payroll services are the smallest shared cost, so small changes in costs can lead to large percentage changes.
- *Internet.* Internet costs increased relative to plan. The Compact receives internet service under a contract negotiated by the Commonwealth of Massachusetts that is available to all state and municipal organizations. In 2022, the minimum service levels of the contract were increased by the Commonwealth of Massachusetts, so the Compact's bill increased.

Internet costs also increased due to the addition of web-based services not anticipated during the 2022-2024 planning process.

- *Other Utilities.* Other utility costs increased relative to plan because the Compact hired a vendor to assist with IT governance documents identified by prior Financial Audits and IT Risk Assessments. This work has been completed.
- *Treasury Services.* Treasury services increased relative to plan because of a staff vacancy (i.e., the Comptroller) and the need to contract out these services until the position was filled. The increase in treasury services corresponds with part of the decrease in salaries.

## **II. Consumer Advocacy Costs related to Energy Efficiency**

### **A. Background on Consumer Advocacy Costs**

Where the Compact classifies any consumer advocacy costs as energy efficiency-related, the Department now requires that the Compact be prepared to demonstrate, at the time final cost recovery is sought, that such activities have a direct energy efficiency-related benefit. Accordingly, in each Plan-Year report, the Compact is now required to identify any consumer advocacy costs that were charged to its energy efficiency budget and provide an explanation supporting the direct energy efficiency-related benefit of such activities. D.P.U. 18-116 at 143.

It is important to note that the Compact's involvement in consumer advocacy matters related to energy efficiency often overlaps with its direct energy efficiency program administration activities: it is not always possible for the Compact to expressly isolate one cost from the other. Therefore, the costs identified herein as consumer advocacy costs are conservative (i.e., potentially on the high side), as they may include amounts spent directly on energy efficiency planning and program design in addition to consumer advocacy matters. In addition, Compact staff do not track their time at this level of granularity and so cannot identify actual hours spent on "consumer advocacy." The Compact's Administrator and its Power Supply Planner may have spent time during 2023 communicating with counsel on matters that arose in the dockets identified below as well as reviewing any of the Compact's pleadings and comments in those dockets. No other Compact staff spent time on consumer advocacy matters.

### **B. 2023 Consumer Advocacy Costs**

In 2023, the Compact's consumer advocacy efforts focused on activities associated with D.P.U. 21-90 (NSTAR Electric Company d/b/a Eversource Energy ("Eversource") Petition for Approval of its Phase II Electric Vehicle Infrastructure Program and its Electric Vehicle Demand Charge Alternative Proposal) and D.P.U. 24-10 (Eversource's Petition for Approval of its Electric Sector Modernization Plan).

<b>Proceeding</b>	<b>2023 Costs</b>	<b>Notes</b>
D.P.U. 21-90	\$3,918	The consumer advocacy worksheet for D.P.U. 21-90, documenting that costs will be allocated based on the actual subject matter of the service performed (e.g., work related to energy efficiency will be allocated to the energy efficiency budget and work related to non-energy efficiency will be allocated to the operating budget) is included in Attachment A of this appendix.
D.P.U. 24-10	\$2,607	The consumer advocacy worksheet for D.P.U. 24-10, documenting that costs will be allocated based on the actual subject matter of the service performed (e.g., work related to energy efficiency will be allocated to the energy efficiency budget and work related to non-energy efficiency will be allocated to the operating budget) is included in Attachment A of this appendix.

**2023 Services Related to D.P.U. 21-90: Eversource’s Petition for Approval of its Phase II Electric Vehicle Infrastructure Program and its Electric Vehicle Demand Charge Alternative Proposal**

For D.P.U. 21-90, the Compact billed \$3,918 to the energy efficiency budget in 2023.

Background: Eversource filed its petition for approval of its phase two electric vehicle (“EV”) infrastructure program (“EV Plan”) and its EV demand charge alternative proposal on July 14, 2021. On August 26, 2021, the Department granted the Compact full party status, determining that the Compact was substantially and specifically affected by the proceeding. See D.P.U. 21-90, Petition to Intervene of the Cape Light Compact JPE (August 12, 2021).

The Department’s investigation in this proceeding affected the Compact’s energy efficiency programs in that the Compact hoped to ensure that its customers would be able to participate in Eversource’s Residential Make-Ready and Charger Rebate program offerings to receive incentives for Electric Vehicle Supply Equipment (“EVSE”). Eversource is requiring customers enrolled in these offerings to also participate in a managed charging program. Since the Compact is the energy efficiency Program Administrator for customers on the Cape and Vineyard, if Eversource were to offer its managed charging program through its energy efficiency program, the Compact would also need to offer a managed charging program through its energy efficiency program in order for its customers to participate in Eversource’s Make-Ready program.

The Compact adjudicated issues raised in the proposed Phase II EV Plan related to demand response programs, including enrollment and funding, as well as the coordination necessary

between Eversource and the Compact to carry out the offerings for the benefit of all customers. The Compact sought to clarify how Eversource will report on and track its offerings and installations as well. Issues such as cost recovery and tracking/reporting of EV offerings and installations may affect all of the electric distribution companies (“EDCs”) and PAs.

The Compact’s participation in this proceeding was necessary to, among other things, clarify how Cape and Vineyard energy efficiency customers would be included in certain offerings, how Eversource intends to coordinate with the Compact as a Program Administrator, and how Eversource intends to handle demand management program enrollment related to its proposed EVSE rebate programs. The Compact sought to ensure that Eversource’s proposal will not discriminate against customers participating in a managed charging program offered by the Compact, should the Compact obtain Department approval of such a program.

In 2023, the Compact’s activities included review and summary of the Department’s Order, compliance and metrics filings, motions for reconsideration, and the Department’s post-order motions order. Among other things, the Order approved Eversource’s requirement that that residential program customers enroll in the Company’s managed-charging program, ConnectedSolutions, for at least one year, with an option to opt out after the first year. Eversource must show in its EE annual report how it is not including this make ready for EE incentives. The Department encouraged Eversource to “work cooperatively with the Compact” for the residential offering. Eversource will consider whether the Compact’s program includes comparable elements to its ConnectedSolutions program.

**2023 Services Related to D.P.U. 24-10: Petition of NSTAR Electric Company d/b/a Eversource Energy, pursuant to G.L. c. 164, § 92B, for Approval by the Department of Public Utilities of its Electric Sector Modernization Plan**

For D.P.U. 24-10, the Compact billed \$2,607 to the energy efficiency budget in 2023.

Background: In 2022, “An Act Driving Clean Energy and Offshore Wind” (the “Climate Law”) required the electric distribution companies to file an electric sector modernization plan (“ESMP”). On September 1, 2023, Eversource filed its draft ESMP with the Grid Modernization Advisory Council (the “GMAC”), which is made up of a wide array of entities. The GMAC reviewed the draft ESMP and provided recommendations on November 20, 2023. On January 29, 2024, Eversource filed its ESMP with the Department, which commenced an ongoing adjudicatory proceeding.

The ESMP includes energy efficiency and demand response in its five-year and ten-year forecasting, in its gas-electric integration working group, and as a part of the solution to meet 2050 climate goals.

In 2023, the Compact's work included review of the draft ESMP and identification of issues of interest related to energy efficiency. The Compact provided written and oral comments to the GMAC in November 2023, and presented on the draft ESMP for its Governing Board. The Compact also reviewed the GMAC recommendations.

The Compact's participation in this proceeding was necessary to clarify Eversource's use of and plans for energy efficiency and demand response in the ESMP. How the ESMP incorporates energy efficiency and demand response will likely have a direct impact on the Compact's own energy efficiency and demand response programs. Specifically, the Compact's questions included whether the ESMP's forecasting includes the Compact's energy efficiency data, how the ESMP may create new opportunities for energy efficiency and demand response, whether the ESMP contains costs for energy efficiency, and how Eversource will interface with the energy efficiency Program Administrators, including the Compact. In addition, the Compact is eager to participate in the proposed gas-electric integration working group that may come out of this proceeding, and thus sought to better understand the purpose and operation of that working group.

The Compact is currently participating as a full party in the ESMP adjudicatory proceeding in D.P.U. 24-10.

## Consumer Advocacy Allocation Worksheet

### Parties involved:

Parties include Eversource, the Cape Light Compact, Attorney General's Office, Department of Energy Resources, Acadia Center, GECA, ChargePoint, FreeWire Technology, and National Grid as a limited party.

### Description of the Matter or Proceeding:

The Department of Public Utilities will investigate Eversource's Phase II petition for approval of its Phase II electric vehicle infrastructure program ("EV Plan") and its electric vehicle demand charge alternative proposal on July 14, 2021. These investigations are held in furtherance of the Department's responsibilities pursuant to Grid Modernization – Phase II, D.P.U. 20-69-A (May 21, 2021) and Section 29 of Chapter 383 of the Acts of 2020, An Act Authorizing and Accelerating Transportation Investment ("Transportation Act").

### Docket Number (if any):

D.P.U. 21-90

1. Does this proceeding raise issues that may impact the Compact's administration of its three-year energy efficiency plan? If yes, please explain.  
Yes, the Compact intends to offer an incentive for Electric Vehicle Supply Equipment ("EVSE") enrolled in the Compact's Connected Solutions Demand Response program in the next three-year (2022-2024) Energy Efficiency Plan. Eversource is the distribution company providing service in the Compact's service territory and thus its EV Plan may affect the Compact's offerings. The Compact is participating in this proceeding both as a consumer advocate for ratepayers on Cape Cod and Martha's Vineyard and as an energy efficiency program and demand response administrator (G.L. c. 25, §21) because of potential impacts and precedents that this proceeding may have on its energy efficiency and other programs. As the Commonwealth's only municipal aggregator program administrator, the Compact can offer its unique expertise and point of view to the Department as it relates to energy efficiency and demand response matters relevant to this proceeding.
2. Does this proceeding raise issues regarding the general administration of energy efficiency in Massachusetts? Are other Program Administrators parties or otherwise intervening? Other stakeholders? If yes, please explain.  
Yes, Eversource Energy (a PA) filed the proposed EV Plan that resulted in this proceeding. The Compact has actively participated in other EV-related dockets, including as a full party in the investigation into Eversource's rate case in D.P.U. 17-05, as a full party in Eversource's grid modernization plan in D.P.U. 15-122, and the Department's investigation into targeted EV rates in D.P.U. 20-69. Each electric

distribution company (also PAs) submitted EV plans and demand charge alternative rate structures as required pursuant to Section 29 of Chapter 383 of the Acts of 2020. National Grid (also a PA) is also participating as a limited party in this docket.

3. Does this proceeding raise issues regarding the Compact's administration of active demand response programs/initiatives/measures? If yes, please explain.

Yes, the Compact intends to pursue issues raised in the proposed Phase II EV Plan related to demand response programs, including enrollment and funding, as well as the coordination necessary between Eversource and the Compact to carry out the offerings for the benefit of all customers. The Compact wants to clarify how Eversource will report and track on its offerings and installations as well.

4. Does this proceeding raise issues regarding the general administration of active demand response in Massachusetts? Are other program administrators parties or otherwise intervening? Other stakeholders? If yes, please explain.

Yes, this proceeding directly impacts Eversource's administration of ADR since it involves Eversource's own EV program. Eversource's proposal may, among other things, expand its current managed charging program, ConnectedSolutions, which does not currently directly promote access to at-home charging. National Grid is a limited party in this proceeding. National Grid and Unitil have EV plans under consideration in related dockets. Issues such as cost recovery and tracking/reporting of EV offerings and installations may affect all of the electric distribution companies/PAs.

5. Does this proceeding concern the efficient utilization of energy in Massachusetts? Are other Program Administrators parties or otherwise intervening? Other stakeholders? If yes, please explain.

Yes, Eversource's petition provides that its Phase II EV Plan advances its Phase I Electric Vehicle Infrastructure Program "by building the infrastructure required to support statewide EV adoption, and helping to enable the Commonwealth's broader transition to a clean transportation future." Widespread EV adoption will help the Commonwealth meet its clean energy goals. As noted above, Eversource is the main party in this docket and National Grid is a limited party to the proceeding (both PAs). The Attorney General's Office, DOER, the Compact and other parties are participating as well.

6. Describe the direct energy efficiency benefit resulting from the Compact's participation in this proceeding.

The Compact needs to investigate Eversource's proposals in this docket to, among other things, clarify how Cape and Vineyard customers would be included in certain offerings, how Eversource intends to coordinate with the Compact as a program administrator, and how Eversource intends to handle demand management program enrollment related to its

proposed EVSE rebate programs. The Compact needs to ensure that Eversource's proposal will not discriminate against customers participating in the Compact's managed charging program.

7. Is the described benefit quantifiable? If yes, please explain and provide any supporting documentation.

Not at present, given that Eversource's proposals are subject to an adjudicatory proceeding and thus may not be approved or may be modified over the course of the proceeding.

8. Will the Compact's participation assist its planning for future energy efficiency plans and/or programs?

Yes. The Department may modify Eversource's EV Plan in this proceeding based on the Compact's and other parties' input. The EV Plan will affect EV development in Eversource's service territory for the next four years. The issues raised by the Compact in Question 6 above will affect the Compact's future energy efficiency plans and programs.

9. Is the Compact's participation in this proceeding a reasonable use of energy efficiency ratepayer funds? Please explain.

Yes, it is necessary for the Compact to participate given the direct impact the outcome will have on the Compact and its energy efficiency customers. Eversource's EV Plan has the potential to allow the Compact to coordinate rebate offerings for its energy efficiency customers, or it may limit Eversource's offerings only to Eversource's managed customer program customers. The outcome of such an issue in this proceeding is likely to set a precedent and affect Eversource's future EV plans. The Compact will seek to ensure consistent opportunities across energy efficiency service territories.

10. Does this proceeding involve other non-energy efficiency issues? If yes, please explain.

The Compact has not yet identified non-energy efficiency issues in this proceeding. However, it is possible that they may arise during the course of the proceeding.

11. What is the initial estimate of the percentage allocation between energy efficiency and non-energy efficiency issues, as set forth in this worksheet?

The costs for this proceeding will be allocated based on the actual subject matter, meaning that any work related to energy efficiency will be allocated as such and any work related to non-energy efficiency will be allocated as such.

12. Discuss any other factors as may be appropriate.

It is important for the Compact to be involved in this proceeding as Eversource's EV

efforts will be ongoing for years to come.

---

13. **To be completed at the conclusion of the proceeding/matter or every 12 months, which ever comes first,** a summary of the actual total costs associated with the Compact's participation and costs recovered through energy efficiency ratepayer funds and operating funds. A brief narrative should accompany any readjustment to the percentage allocation explaining the basis for the reallocation.

Please attach:

1. Initial Petition (attached)
2. Notice of Proceeding (attached)
3. Compact's Petition to Intervene (attached)
4. Agreements with Expert Consultants, if any

## Consumer Advocacy Allocation Worksheet: DPU 24-10

### Parties involved:

The electric sector modernization plan (“ESMP”) will be reviewed first by the Grid Modernization Advisory Council (“GMAC”), which is made up of a wide array of entities, including the Attorney General’s Office, Department of Energy Resources (“DOER”), Massachusetts Clean Energy Center, Green Energy Consumers Alliance, Acadia Center, New Leaf Energy (distributed generation (“DG”) representative), and ENGIE (storage representative). It is currently too early to know the parties other than Eversource in the DPU proceeding. Parties to previous proceedings related to grid modernization included the Cape Light Compact, Attorney General’s Office, Department of Energy Resources, Acadia Center, and National Grid as a limited party. Those parties may again participate in this docket.

### Description of the Matter or Proceeding:

The ESMPs were required by “An Act Driving Clean Energy and Offshore Wind” (“Climate Law”) in 2022. The electric distribution companies (“EDCs”) filed their draft ESMPs with the GMAC on September 1, 2023. The GMAC will provide feedback and recommendations by November 20, 2023. The DPU adjudicatory proceeding will commence by January 29, 2024, in DPU 24-10.

Through the ESMPs, the EDCs must seek to upgrade the distribution system and meet certain objectives, including:

- Improve grid reliability, communications, and resiliency;
- Enable increased, timely adoption of renewable energy and DERs;
- Promote energy storage and electrification technologies for decarbonization;
- Prepare for climate-driven impacts on T&D systems;
- Accommodate transportation and building electrification, and other new loads;
- Minimize or mitigate impacts on ratepayers; and
- Provide benefits to low-income customers.

### Docket Number (if any):

D.P.U. 24-10 (Eversource Energy)

1. Does this proceeding raise issues that may impact the Compact’s administration of its three-year energy efficiency plan? If yes, please explain.  
Yes, the ESMP may affect the Compact’s energy efficiency program because it is considering the role of energy efficiency in three planning horizons (five year, ten year and 2035-2050) to help the Commonwealth reach its 2050 climate goals. How Eversource positions energy efficiency in its planning horizons may affect the Compact’s future Three Year Plans. For example, the GMAC has noted that Eversource has not

adequately factored demand management into its 2035-2050 planning horizon. Generally, the Compact is concerned that the ESMP is too focused on building new or upgrading existing substations and other utility facilities, rather than effectively considering how energy efficiency could best be used in targeted situations to relieve constraints.

In addition, Eversource has proposed a Gas-Electric Integrated Planning working group, which the Compact will want to monitor the development of to ensure that it may be considered for a role on it. The Compact should be involved in any integrated planning related to Cape Cod and Martha's Vineyard. The objectives of the working group include providing recommendations for how the three-year energy efficiency program process should align with integrated gas-electric planning. The Compact is concerned about how the working group may overlap with and affect energy efficiency planning.

Specific to the Compact, the ESMP notes the Compact's role as a program administrator, but the plan does not mention working in partnership with the Compact to bring about demand response and least-cost alternatives, nor having the Compact participate as part of the newly proposed Joint Utility Planning Working Group discussed in Section 11. DOER recommendation #114 from October 26th provided that the EDCs should "identify initial potential locations for pilot programs to start the transition from gas to electric in their overlapping gas and electric service territories." The Compact has commented to the GMAC that it would welcome integrated planning and participation in pilot programs to be part of the solution by developing targeted programs to assist with meeting the Commonwealth's climate goals.

2. Does this proceeding raise issues regarding the general administration of energy efficiency in Massachusetts? Are other Program Administrators parties or otherwise intervening? Other stakeholders? If yes, please explain.

Yes. Eversource Energy (a PA) filed its Draft ESMP with the GMAC and will file its ESMP with the DPU. The other EDCs will likewise file ESMPs. It would be typical for National Grid (also a PA) to participate as a limited party in Eversource's DPU 24-10 proceeding. The ESMPs consider how energy efficiency and demand response may be used to help meet the Commonwealth's 2050 climate goals. See Section 1 above. Eversource has made assumptions regarding the use of energy efficiency and demand response in its three planning horizons that have been called into question by the GMAC and will be further explored in the DPU proceeding.

3. Does this proceeding raise issues regarding the Compact's administration of active demand response programs/initiatives/measures? If yes, please explain.

Yes, the proceeding raises active demand response (“ADR”) issues for the Compact. Eversource’s ESMP recognizes that, by 2028, all customers will have advanced metering with access to their usage information and more tools to engage in demand response and clean energy programs. Advanced metering would enable time-varying rates (“TVR”) for residential and small business customers, which has the potential to both increase the level of participation in the Compact’s ADR programs and reduce the per-participant participation incentive funded by energy efficiency. In addition, the Compact will explore whether there may be opportunities to build on CVEO. For example, the GMAC has called for strengthening of the MassSave/weatherization programs for Environmental Justice/Low Income housing and for combining them with electric heat incentives.

4. Does this proceeding raise issues regarding the general administration of active demand response in Massachusetts? Are other program administrators parties or otherwise intervening? Other stakeholders? If yes, please explain.

Yes, this proceeding directly affects Eversource’s administration of ADR in Massachusetts. National Grid may also be a limited party in the DPU’s investigation. See response to #3 regarding availability of advanced metering by 2028. The GMAC has raised questions regarding Eversource’s lack of detail related to TVR in the ESMP. Further, the GMAC has questioned Eversource’s assumptions in the ESMP related to demand response so that will be explored in the DPU proceeding (e.g., discounting the potential of winter demand response).

5. Does this proceeding concern the efficient utilization of energy in Massachusetts? Are other Program Administrators parties or otherwise intervening? Other stakeholders? If yes, please explain.

Yes, the Climate Act required the ESMPs to consider how to improve grid reliability, communications and resiliency. As noted above, Eversource is the main party in this docket and National Grid may become a limited party to the proceeding. As noted above, the Attorney General’s Office, DOER, the Compact and other parties (especially those that participated in D.P.U. 21-80 (grid modernization)) may participate as well.

6. Describe the direct energy efficiency benefit resulting from the Compact’s participation in this proceeding.

Eversource’s Draft ESMP includes modeling assumptions related to energy efficiency and demand response for three planning horizons. How the ESMP ultimately incorporates energy efficiency and demand response will likely have a direct impact on the Compact’s energy efficiency and demand response programs. The Compact has concerns related to how energy efficiency and demand response are included in the ESMP in terms of how it may impact the Compact’s administration of an energy efficiency plan on the Cape and Vineyard. The Compact supports GMAC

recommendations asking for more detail. The Compact also needs to monitor development of any new working group related to electric-gas integration planning in the Cape Cod and Martha's Vineyard service territory. See also Section 8 below.

7. Is the described benefit quantifiable? If yes, please explain and provide any supporting documentation.

Not at present, given that Eversource's proposals are subject to an adjudicatory proceeding and thus may not be approved or may be adjusted over the course of the proceeding.

8. Will the Compact's participation assist its planning for future energy efficiency plans and/or programs?

Yes. There will be overlap between the ESMPs and energy efficiency in the Commonwealth. Understanding Eversource's ESMP, especially those sections related to energy efficiency and demand response, will assist the Compact in its own future energy efficiency plans and programs. Eversource's proposed investments along with already approved upgrades to its facilities (e.g., advanced metering, DERMS) may create new opportunities for energy efficiency and demand response. The Compact may also be able to participate in a gas-electric integration working group that may come out of this proceeding.

9. Is the Compact's participation in this proceeding a reasonable use of energy efficiency ratepayer funds? Please explain.

Yes, the ESMP seeks to provide a pathway to meeting the Commonwealth's 2050 climate goals, including through energy efficiency and demand response programs. It is necessary for the Compact to participate to ensure its understanding of the ESMP, be able to ask questions in discovery to clarify the ESMP, and to consider how and where its own energy efficiency programs may be involved. Eversource's ESMP has the potential to provide the Compact with opportunities to enhance its energy efficiency offerings by targeting areas of constraints. The Compact will also seek to ensure the integration of its own programs and consistent opportunities across energy efficiency service territories.

10. Does this proceeding involve other non-energy efficiency issues? If yes, please explain.

Yes, the proceeding also implicates power supply concerns, including time-varying rates, the CIP dockets, substation upgrades and other investments on Cape Cod and Martha's Vineyard, rate design, peak shaving, metrics, and double poles. In particular, the Compact is concerned with the lack of creativity in the ESMP in terms of how Eversource might partner with municipal aggregations to create solutions to system constraints. The Compact needs to participate here to better understand Eversource's

proposals and what the impacts may be on the Compact's power supply, including its ability to offer TVR supply rates to its aggregation customers.

11. What is the initial estimate of the percentage allocation between energy efficiency and non-energy efficiency issues, as set forth in this worksheet?

The costs for this proceeding will be allocated based on the actual subject matter, meaning that any work related to energy efficiency will be allocated as such and any work related to non-energy efficiency will be allocated as such.

12. Discuss any other factors as may be appropriate.

It is important for the Compact to be involved in this proceeding as it is Eversource's first ESMP and will apply for the next five years. This proceeding will set the stage for how future ESMPs will be considered as well.

13. **To be completed at the conclusion of the proceeding/matter or every 12 months, which ever comes first,** a summary of the actual total costs associated with the Compact's participation and costs recovered through energy efficiency ratepayer funds and operating funds. A brief narrative should accompany any readjustment to the percentage allocation explaining the basis for the reallocation.

Please attach:

1. Initial Petition (attached)
2. Notice of Proceeding (not yet available)
3. Compact's Petition to Intervene (not yet available)
4. Agreements with Expert Consultants, if any

## **APPENDIX CLC-2 CAPE LIGHT COMPACT JPE C&I EXISTING BUILDINGS INCENTIVES**

For the 2022-2024 Three-Year Plan, the Department approved the Compact's C&I enhanced incentive (up to 100% for weatherization, electrification and lighting measures) for municipal, small non-profits, small businesses and micro-businesses. The Department requested that the Compact identify with specificity in its Plan-Year Report who qualifies for this enhanced incentive in the C&I Existing Buildings Program. D.P.U. 21-126 at n.167. Below is a detailed description of the customers eligible for the enhanced incentive.

**Municipalities:** to be eligible the municipality must have (1) an active electric account number in the municipality's name or show proof of ownership, and (2) that account must be within the Cape or Vineyard territory.

**Small Non-Profits:** to be eligible: (1) the non-profit must own the building or have a long-term lease (typically greater than the measure life of the measures being installed); (2) the non-profit must be a charitable 501(c)(3) organization and have been in operation for at least 5 years on the Cape or Vineyard; (3) active electric accounts must be in the non-profit's name; and (4) the annual electric usage for all accounts on the site must not exceed 100,000 kilowatt-hour ("kWh") in the previous 12 months.

In addition, the non-profit must provide documentation satisfying one of the following categories: (1) unrestricted annual operating revenue of less than \$15 million for an organizational purpose to provide service to the low-income (defined as up to 60% of the state median income) population; (2) unrestricted annual operating revenue of less than \$2 million for an organizational purpose of either (i) promoting and advancing economic development; (ii) social services that are open to all members of the public; or (iii) cultural services that increase access to arts, science, history and heritage.

**Small Businesses:** to be eligible, the business must use less than 1.5 million kWh annually. These customers often participate in the Compact's program as part of the Main Streets efforts that the Compact holds in Environmental Justice Communities or communities that have had lower participation rates.

**Micro-businesses:** to be eligible: (1) the business must have occupied its current location for more than 12 months (or 36 months if the business is in a month-to-month lease); (2) the business must have at least 12 months remaining on its current lease (if applicable); (3) the electric accounts at the site must be in the name of the business; (4) the business' annual electric usage for all accounts on the site must not exceed 30,000 kWh in the prior 12 months; (5) other than the lessor/lessee

relationship, the business must be a party unrelated to the owner of the building and the building owner and the micro-business lessee must sign the Compact's program participation application. While some eligible micro-businesses may be building owners, this incentive is specifically designed for micro-business tenants who are unable to make improvements to the building without landlord approval.

## **APPENDIX CLC-4 CAPE LIGHT COMPACT JPE ENERGY EDUCATION OUTREACH ACTIVITIES**

The Compact is committed to energy education outreach across the Cape and Vineyard. The Compact continues to support community efforts to develop a deeper and broader knowledge of energy efficiency technology and practices, moving towards an energy-literate society.

In 2023 the Compact returned to offering in-person, hands-on education training to educators. Partnering with the Program Administrators and its vendor National Energy Education Development Project (“NEED”), the Compact participated in the 2023 Massachusetts Energy Conference for Educators in Sturbridge. Over 150 educators from across Massachusetts attended the three-day training which focused on energy efficiency and the science of energy.<sup>10</sup>

Additionally, the Compact held an Energy Carnival for over 400 students at the Dennis-Yarmouth Mattacheese Middle School.

The Compact provided the following energy education materials to support its Cape and Vineyard teachers:

- 200 Energy House kits for students
- 4 Hydro kits for teachers
- 125 Solar Panel kits for students

D.P.U. 24-65

**PRE-FILED TESTIMONY OF  
MARGARET T. DOWNEY  
ON BEHALF OF  
CAPE LIGHT COMPACT JPE**

**I. INTRODUCTION TO TESTIMONY**

**Q. Ms. Downey, please state your name, business address and employer.**

A. My name is Margaret T. Downey. My business address is c/o Cape Light Compact JPE (the “Compact”), 261 Whites Path, Unit 4, South Yarmouth, MA 02664. I am employed by the Compact and serve as the Compact Administrator. I have served in this position since the Compact’s inception in 1997.

**Q. Have you previously testified before this or any other Commission?**

A. Yes. I have previously testified before the Department of Public Utilities (the “Department” or “DPU”) on behalf of the Compact in its 2013-2015, 2016-2018, 2019-2021 and 2022-2024 Energy Efficiency Plan proceedings. These proceedings were docketed, respectively, as *Cape Light Compact*, D.P.U. 12-107, *Cape Light Compact*, 15-166, *Cape Light Compact JPE*, D.P.U. 18-116 and *Cape Light Compact JPE*, D.P.U. 21-126. I have also testified before the Department in various energy efficiency proceedings related to the three-year plans, such as *Cape Light Compact JPE*, D.P.U. 19-96, *Cape Light Compact JPE*, D.P.U. 22-116, *Cape Light Compact JPE*, D.P.U. 22-137, *Cape Light Compact JPE*, D.P.U. 23-58 and *Cape Light Compact JPE*, D.P.U. 23-135.

**Q. Please summarize the testimony in this document.**

A. The testimony is responsive to the Department’s directive in the order approving the Cape & Vineyard Electrification Offering (“CVEO”) that the Compact, “include testimony and exhibits addressing the implementation of the CVEO, including actual costs, benefits, variances, cost effectiveness, and all other information Program

Administrators are required to report for core initiatives and programs.” D.P.U. 22-137,  
n.40.

**Q. Have you previously testified to the status of the Compact’s implementation of CVEO?**

A. Yes. As required by the Department as part of its approval order for CVEO, I testified in the Compact’s 2024 energy efficiency surcharges dockets (initial and revised), *Cape Light Compact JPE*, D.P.U. 23-135 (2023) and *Cape Light Compact JPE*, D.P.U. 24-51 regarding the Compact’s projected and actual Massachusetts Alternative Energy Portfolio Standard (“APS”) incentives and Massachusetts Renewable Energy Portfolio Standard (“RPS”) revenues associated with installed CVEO technologies.

**Q. Can you briefly describe CVEO?**

A. Yes. CVEO is the Compact’s strategic electrification and energy optimization demonstration project approved by the Department in D.P.U. 22-137 pursuant to St. 2022, c. 179, §87A (“Section 87A”). Through CVEO, the Compact plans to support 100 low- and moderate-income customers to: (1) convert their oil, propane or electric resistance heat to cold climate air source heat pumps (“heat pumps”); and (2) install solar photovoltaic (“PV”) systems to support electrification of their heating systems. A portion of these customers will also receive battery energy storage systems for demand response and resiliency. In accordance with Section 87A, customers will also fully displace their fossil fuel cooking appliances (excluding outdoor grills) with electric or induction stoves.

## **II. THE COMPACT’S IMPLEMENTATION OF CVEO**

**Q. Please describe the Compact’s implementation of CVEO since the Department’s approval in January 2023.**

1     A.     The Compact has diligently pursued implementation of CVEO. During 2023, the  
2           Compact prepared the various contracts and terms and conditions for the offering and  
3           coordinated this effort with Thielsch Engineering, Inc. d/b/a RISE Engineering (“RISE”),  
4           its lead vendor for CVEO.

5           The Compact met with public and not-for-profit housing entities on Cape Cod and  
6           Martha’s Vineyard and held two general information sessions regarding CVEO. The  
7           Compact also gave a presentation on CVEO to the Boards of Selectmen in the towns of  
8           Truro, Wellfleet, Eastham, Bourne, Chatham, Dennis, Brewster, Orleans, Falmouth,  
9           Tisbury, West Tisbury, Oak Bluffs, Edgartown, Aquinnah and Chilmark. As of the end  
10          of May 2024, the Compact had 183 inquiries regarding participation in CVEO.

11          After fielding the inquiries and accounting for program qualification (e.g., some  
12          interested customers could not enroll because they did not satisfy the income  
13          requirements of CVEO and some could not enroll because they heated their homes with  
14          natural gas), the Compact has currently enrolled 84 participants for an initial CVEO  
15          home energy assessment. The Compact has approved 48 participants for CVEO, and 38  
16          participants have fully executed contracts to proceed with the installation of CVEO  
17          technologies.

18          In addition, RISE has contracted four solar contractors and 12 heat pump contractors to  
19          install the respective CVEO technologies.

20          The installation of CVEO technologies commenced in January of 2024. As of the end of  
21          April 2024, 10 CVEO participants have completed installation of their respective CVEO  
22          technologies. The Compact estimates that 55 of the 84 enrolled participants will

1 complete installation of their respective CVEO technologies by the end of 2024.

2 Throughout 2023, the Compact periodically updated the Program Administrators  
3 regarding the status of CVEO.

4 **III. ACTUAL CVEO COSTS, BENEFITS, VARIANCES, COST EFFECTIVENESS,**  
5 **AND OTHER RELATED INFORMATION FOR 2023**  
6

7 **Q. What is the Department approved budget for CVEO?**

8 A. In D.P.U. 22-137 the Department approved a CVEO budget of approximately 6 million  
9 dollars.

10 **Q. Does the Compact have actual costs, benefits, variances, cost effectiveness, and**  
11 **other related plan year report information to report on for CVEO in 2023?**  
12

13 A. No. The budget approved for CVEO does not include Sales, Technical Assistance &  
14 Training (“STAT”) costs associated with the initial tasks of performing home energy  
15 assessments (“HEA”) or home weatherization activities for CVEO participants that did  
16 occur in 2023. See D.P.U. 22-137, Attachment DPU 5-7(a). Therefore, these costs are  
17 accounted for in the Compact’s reporting in its 2023 Plan Year Report. Also, the  
18 Compact’s Evaluation & Market Research costs were budgeted for 2024.<sup>1</sup> *Id.* Further,  
19 the installation of CVEO technologies did not begin until 2024. Thus, the participant  
20 incentives associated with these technologies and the STAT and marketing and  
21 advertising costs in the CVEO budget for solar and battery technologies, respectively,

---

<sup>1</sup> Although the \$300,000 in approved evaluation costs were budgeted for 2024, the Compact did receive an invoice in November 2023 from its evaluation vendor for \$19,068.10 for services associated with finalizing its work plan for the CVEO evaluation (e.g., the vendor’s stage 3 plan) and an invoice in February of 2024 for \$4,530.00 in services performed during the fourth quarter of 2023 associated with interviewing the Compact’s CVEO implementation staff so that the vendor could learn more about CVEO program management.

were not expended in 2023 and will be captured in the Compact's required CVEO reporting for 2024.

**IV. ADDITIONAL IMPLEMENTATION DETAILS**

**Q. Does the Compact wish to provide the Department with any additional detail regarding its implementation of CVEO to date?**

A. Yes. There are two aspects of the Compact's implementation of CVEO that were not expressly addressed during the Department's review and approval of CVEO in D.P.U. 22-137. First, is the installation of heat pump hot water heaters for certain CVEO participants. Second, is the variance in income eligibility for CVEO customers living in affordable, deed-restricted housing. These CVEO implementation issues are discussed in more detail below.

**Q. Please describe how heat pump hot water heaters are installed in connection with implementation of CVEO.**

A. Section 87A authorizes "whole building efficiency, electrification and greenhouse gas emission reduction offerings" and requires "full displacement of fossil fuel heating and cooling equipment..." St. 2022, c. 179, §87A. In certain CVEO participant homes, fossil fuels are used to heat their hot water. In many cases the hot water heater is part of the heating system and must be removed as part of the full displacement of the fossil fuel heating system. In other cases, there are independent hot water systems also heated by fossil fuels. The Compact believes that because Section 87A is a whole building electrification offering, those fossil fuel hot water systems need to be removed as well. In these instances where fossil fuel hot water systems are removed, the CVEO participant needs a new heating system for hot water. Thus, where possible, those fossil fuel systems

1 are replaced with a heat pump hot water heater and if the home configuration does not  
2 support installation of a heat pump hot water heater, an electric hot water heater is  
3 installed.

4 **Q. Does the record in D.P.U. 22-137 discuss installation of heat pump hot water heaters**  
5 **for the scenarios you just described?**

6  
7 A. Not expressly. The Compact's prefiled testimony noted that heat pump water heaters  
8 would be recommended to customers as part of a HEA and noted that all CVEO  
9 participants would be required to first implement all recommendations from a HEA  
10 before installing the CVEO technologies. D.P.U. 22-137, Exhibit MTD at 14 and n.3.  
11 However, the record does not contain incentive information associated with installation  
12 of heat pump hot water heaters.

13 **Q. What are the incentives for heat pump hot water heaters for low- and moderate-**  
14 **income customers in the 2022-2024 Three-Year Plan?**

15  
16 A. Income eligible customers receive a 100% incentive for the installation of heat pump hot  
17 water heaters as part of the Income-Eligible Coordinated Delivery program. Moderate  
18 income customers receive a rebate of \$750 as part of the Residential Coordinated  
19 Delivery program.

20 **Q. What is the heat pump hot water heater incentive difference for low- and moderate-**  
21 **income customers participating in CVEO and those not participating in CVEO?**

22  
23 A. There are no differences for income eligible customers. For moderate income CVEO  
24 participants residing in deed restricted properties, the customer receives a 100% incentive  
25 for installation of the heat pump hot water heater consistent with the CVEO model to  
26 provide higher incentives for customers living in deed restricted properties,

1           whereas a non-CVEO moderate income customer in deed-restricted housing would  
2           receive a \$750 rebate.

3   **Q.   Does the Compact need to adjust the CVEO budget to address the heat pump hot**  
4   **water heater implementation issue you just described?**

5  
6   A.   No. The Compact accounts for heat pump hot water heater incentives outside of the  
7       CVEO budget approved in D.P.U. 22-137.

8   **Q.   What is the Program Administrator defined income level for moderate income**  
9   **customers under the 2022-2024 Three-Year Plan?**

10  
11   A.   Moderate income is defined as 61-80% of state or area median income (“SMI” and  
12       “AMI”), whichever is deemed most beneficial to the customer.

13   **Q.   Please describe the limited instance in CVEO implementation where the Compact**  
14   **has identified that the affordable housing income restrictions are different from the**  
15   **Program Administrator defined income level for moderate income customers.**

16  
17   A.   Two CVEO participants in Edgartown, one participant in Oak Bluffs and one  
18       participant in West Tisbury reside in affordable housing where the income restriction for  
19       the housing is set at 140% of SMI. One CVEO participant in Tisbury resides in  
20       affordable housing where the income restriction for the housing is set at 120% of SMI.

21   **Q.   Has the Compact verified the income level for these five CVEO participants?**

22   A.   Not yet. Given that the customers were residing in deed restricted housing, the Compact  
23       did not undertake an initial income screen for these customers. The Compact recently  
24       asked for income verification data from these five participants but to date it has not  
25       received the data.

26   **Q.   What will the pending income verification data mean for CVEO implementation in**  
27   **this limited instance?**

1 A. If the data confirms the customer is within the Program Administrator defined income  
2 level for income eligible or moderate-income customers, there is no issue for CVEO  
3 implementation. If the data confirms that the customer's income level is higher than the  
4 Program Administrator defined income level for moderate income (but within the income  
5 limit for the affordable housing), the Compact would like to offer the customer CVEO  
6 incentives consistent with the CVEO model approved by the Department. The CVEO  
7 model provides a higher incentive to CVEO participants residing in deed restricted  
8 property because the deed restriction ensures that the CVEO technologies will continue to  
9 benefit income-constrained customers for the duration of the technology's life. D.P.U.  
10 22-137, Exhibit MTD at 11.

11 **Q. Will the CVEO implementation issue you just described extend beyond these five**  
12 **CVEO customers?**

13  
14 A. No. Going forward, the Compact will income screen those customers in deed restricted  
15 properties above 80% SMI/AMI to ensure that all customers residing in deed restricted  
16 properties authorized to participate in CVEO are either income eligible or moderate-  
17 income customers as those terms are defined by the Program Administrators.

18 **V. CONCLUSION**

19 **Q. Does this conclude your testimony?**

20 A. Yes, it does.
